## Consultancy Services

### Security Audits & Inspections

Security audits for Commercial  
Premises, Airports, Ports and  
Shipping Vessels.

### Regulated Agent Regime for Airfreight Security

Study, Development and  
Implementation of RAR in accordance  
to ICAO Annex 17.

### Hold Baggage Screening System

Study, Development and  
Recommendations for HBS systems in  
Airports and Ports.

## Corporate Security Training

### Bomb Threat Management

Understanding & Managing Security  
Threats

### Security Management

Security Awareness for Employees

### First Line Crisis Mitigation

### Crime Prevention Techniques

Campus, Hospital and Hotel Security

Risk & Vulnerability Assessment

Basic Investigations Course

## China urges Malaysia to intensify search for flight MH370

China has urged Malaysia to "step up its efforts" in the search for the Malaysia Airlines passenger plane that disappeared on Saturday. Malaysia said it was widening the hunt, after days of searching found no trace of the plane or the 239 people on board - most of whom were Chinese. Rescue teams from nine countries will now scour areas stretching from the Malacca Strait to the South China Sea. Beijing-bound flight MH370 vanished shortly after it left Kuala Lumpur. [Read more on MH370](#)

## Terrorists unlikely culprits in plane tragedy

[Click for Video Report](#)

The catastrophic loss of Malaysia Airlines flight MH370 seems unlikely to be due to terrorism - which by definition has to be politically (or ideologically or religiously) motivated and have a purpose. I cannot think of a group that would want to down a Malaysia Airlines aircraft. Since the aircraft's disappearance, I have heard Uighur separatists from China's Xinjiang province in the country's north-west mentioned as likely candidates, but it would seem well beyond their capabilities based on their past efforts.

## Stolen Passports Show Post-9/11 Airline Security Flawed

The discovery that two passengers boarded the missing Malaysian jet using stolen passports reveals flaws in the screening of air travelers that persist more than 12 years after security worldwide was strengthened in the wake of the Sept. 11 terror attacks. More than 40 million passports are listed as missing on a database created by Interpol in 2002, yet the international police agency says planes were boarded more than a billion times last year without the travel documents being screened against the register. ## Air China to trial Ku-band in-flight connectivity

Air China has signed an agreement with Global Eagle Entertainment to launch a trial of its high-speed, Ku-band satellite-based connectivity service. The trial will mark the first trial of such a service by the Chinese carrier, and it will take place on one of its Boeing 777-200s. As part of the agreement, Global Eagle will provide Air China with its complete Ku-band connectivity solution, in addition to

support for aeronautical certifications, training and programme management. The two parties are currently working to complete the necessary certification processes, and expect to receive the go-ahead to start the trial later this year. [Read more](#)

## Aviation & Maritime Training

## Onboard innovation: Re-imagining the A320

"If you can imagine it, you can achieve it; if you can dream it, you can become it." American author and scholar William Arthur Ward's often cited quote aptly describes the type of 'blue sky' thinking that is driving technological advancements on the ground these days.

## Woodlands checkpoint vehicle dash: Man charged with vandalism, acting rashly

A 64-year-old man was charged in court on Monday with vandalism and acting rashly, after his car bulldozed through the clearance barrier at the Woodlands Checkpoint on Saturday afternoon. Tan, who allegedly drove his Singapore-registered gold Mercedes Benz through the arrival car channel while trying to escape officer checks, also is said to have caused hurt to an officer named Safie Mahrom, CNA reported. ## Two arrested over racist pipe bomb attacks in Londonderry

Two men, aged 40 and 32, have been arrested in connection with two racist pipe bomb attacks in Londonderry. The devices, which were packed with nails, were used to target two houses occupied by Romanian families in the Waterside area on Saturday. Nine people, including at least one child, escaped injury when the devices exploded outside their homes in Lapwing Way and Lincoln Court. [Read more](#)

## Charity defends decision to keep funding group fronted by terror suspect Moazzam Begg

A high-profile charity has defended its decision to continue bankrolling a controversial Islamic rights group fronted by a Birmingham man charged with attending a terror training camp in Syria. CagePrisoners, an organisation founded by Moazzam Begg, who has recently appeared in court on terror charges, has been given £305,000 by the Joseph Rowntree Foundation Charitable Trust. ## Hong Kong drone pilot's fine dropped as US authorities plan appeal

The US Federal Aviation Administration (FAA) is to appeal after a judge threw out a fine against Hong Kong-based Raphael Pirker for operating a drone while filming a commercial in 2011. Pirker was fined US\$10,000 and the court decision could open up the United States' skies to more unmanned-aircraft flights. The FAA had fined Pirker, known in drone circles as "Trappy", in 2011 after he flew a small drone over the University of Virginia, shooting video to be used in an advertisement for its medical school.
