Consultancy Services

Security Audits & Inspections

Security audits for Commercial Premises, Airports, Ports and Shipping Vessels.

Regulated Agent Regime for Airfreight Security

Study, Development and Implementation of RAR in accordance to ICAO Annex 17.

Hold Baggage Screening System

Study, Development and Recommendations for HBS systems in Airports and Ports.

Writing of security Programs

Corporate Security Training

Bomb Threat Management

Understanding & Managing Security Threats

Security Management

Security Awareness for Employees

First Line Crisis Mitigation

Crime Prevention Techniques

Campus, Hospital and Hotel Security

Risk & Vulnerability Assessment

Basic Investigations Course

Al-Qaeda heir Hamza bin Laden killed: US media

Osama bin Laden's son Hamza, chosen heir to the leadership of Al-Qaeda, has been killed, US media reported on Wednesday (Jul 31), citing American officials. NBC News said three US officials had confirmed they had information of Hamza bin Laden's death, but gave no details of the place or date. The New York Times subsequently cited two US officials saying they had confirmation that he was killed during the last two years in an operation that involved the United States. Questioned by reporters in the Oval Office, President Donald Trump did not confirm or deny the NBC report.

Public-Private Partnerships May Revolutionize Airport Security

Dayton Bar

Computed tomography scanners, which have been used for years in scanning checked luggage at airports, are now being piloted at airport checkpoints for carry-on bags. The broader application of the technology could someday afford all travelers the perks currently granted to those in the Department of Homeland Security's Trusted Traveler Programs such as Global Entry and PreCheck. By employing CT scanners at TSA checkpoints, airline passengers could begin leaving their liquids and laptops in carry-on luggage and their jackets on as they pass through security, which would reduce the security experience but not the security.

US Showdown With Turkey to Prevent Slaughter of Christians, Kurds

The U.S. is engaged in a showdown with Turkey over Turkish President Recep Erdogan's [threats to "eliminate"](#) America's Kurdish and Christian allies in northeast Syria. Erdogan says he will invade northeast Turkey "very soon" to "eliminate all threats to its national security," a commonly used euphemism by the Islamist president against the Kurds and other minority groups which comprise the Syrian Democratic Forces (SDF). Erdogan views the SDF — America's allies who eliminated ISIS — as a threat to Turkey due to the

Kurd's aspirations for sovereignty. An attack would also threaten the safety of U.S. forces working with the SDF in the area. It would also mean that the Kurds would not have the capacity to guard the 15,000 foreign ISIS fighters they have captured, as every soldier would be needed for the fight against Turkey.

Replicating Insect Vision to Improve Camera Detection Systems

Researchers from the University of South Australia are creating new technology based on the extraordinary vision of insects. As [reported](#), the past eight years have seen the team replicate the visual functionality of these insects and are using them as a basis to improve detection systems in cameras. The bio-inspired research of the team led by the University's Dr Russell Brinkworth, a neuroscientist, mechatronic engineer and robotics expert; and Professor Anthony Finn, Director of the Defence and Systems Institute, has a range of applications.

Anti-Semites Writing California High School Curriculum

Three committee members tasked writing California high school curriculum have expressed [sympathy or full support](#) for the Boycott, Divest and Sanction (BDS) Movement against Israel, reported the [Washington Free Beacon](#) in a recent expose. The BDS movement has been deemed at its core anti-Semitic, according to the [definition of anti-Semitism](#) adopted by the U.S. State Department and 31 other countries worldwide. In addition, one of the teachers on the 18-member committee is a Palestinian activist, who currently uses teaching materials that utilize state-owned media outlets from Iran and Qatar as source material.

Israeli flight attendant dies after contracting measles

An Israeli flight attendant and mother of three has died of measles. Rotem Amitai, 43, died Tuesday, according to Beilinson Hospital in Petah Tikva, Israel. Amitai had traveled from New York to Tel Aviv a few days before developing a fever in March, but it's not clear whether she was infected on a flight, in New York or in Israel, according to Israel's Ministry of Health. Amitai was vaccinated against the disease as a child, but like many people her age around the world, she received only one dose of the vaccine. She was otherwise healthy before contracting measles.

Guns found at airport security increasing; 5 found in Dayton

More than 2,600 firearms have been found during searches by TSA at U.S. airport security checkpoints this year, including five at the Dayton International Airport — a trend that's expected to meet if not surpass last year's record breaking total confiscated. Transportation Security Administration officials at the Dayton airport said they find prohibited items every day in travelers' carry-on bags, ranging from full-size hair products and aerosol cans to the occasional firearm. Not including liquids and aerosols, about 25 to 50 pounds of prohibited items are collected in Dayton every month, said TSA regional spokesman Mark Howell.

Mass Shootings: Lone Wolf or Stochastic?

Following the recent mass shootings, Americans are coming together to explore new methods for preventing violent extremism (PVE). For starters, we need to rethink how we look at the label of "lone wolf" terrorist. The new buzzword for these "lone wolf" acts of terrorism that has popped up is "stochastic (randomly occurring but statistically predictable) terrorism." It's an concept being explored in the wake of our recent domestic terror and mass shooting sprees. Writing in the *The Washington Post*, Juliette Kayyem proposes there is, in fact, no lone wolf. Kayyem is the assistant secretary at the Department of Homeland Security and the faculty chair of the homeland security program at Harvard University's Kennedy School of Government.

TSA offers tips to travelers

The Transportation Security Administration set up a display at the Gulfport-Biloxi International Airport to remind travelers about TSA rules regarding items prohibited from being taken on board planes. TSA featured bins full of items that have been intercepted by the agency at our airport. The agency reminds passengers to arrive early and research what is not allowed in carry-on bags in an effort to make the screening process more efficient. Passengers bringing firearms continues to be a problem.
