Swedish Woman Suspected of Being an Islamist Extremist Arrested at Airport

A Swedish woman has been arrested on suspicion of terror offences after landing at Gatwick Airport. The 40-year-old suspect arrived in the UK on a flight from Italy on Thursday afternoon. *The Independent* understands she is suspected of being an Islamist extremist. A spokesperson for Counter Terrorism Policing South East said she was stopped by police officers under schedule 7 of the Terrorism Act 2000. "She was subsequently arrested under Section 41 of Terrorism Act 2000 on suspicion of commission, preparation or instigation of acts of terrorism," a statement added.

Two-Day CBRN Exercise at Heathrow Tests Multi-Agency Readiness

The Metropolitan Police Service (MPS) in London, U.K., along with emergency service partners and Heathrow Airport, carried out a two-day exercise that included the live play of a Chemical, Biological, Radioactive, Nuclear (CBRN) incident at the Heathrow Express rail hub. The hub connects Heathrow Airport to the capital and beyond. Following the success of a similar exercise named 'Raptor' in 2018, Heathrow hosted Exercise Gator, creating a fully immersive planned exercise experience across areas of the airport after operating hours. Volunteers and colleagues who work at the airport took part in the command and control element of the exercise.

Aviation Security Questioned as Stowaway Falls from Landing Gear into Garden

There have been calls for fresh scrutiny of aviation security as efforts continue to identify a man whose frozen body fell into a garden in London from the landing gear of a Kenya Airways plane. Investigations have centred on Nairobi airport, where the man is believed to have concealed himself in the aircraft, but one aviation expert suggested airlines and plane manufacturers could take steps including fitting heat sensors to detect stowaways. A bag, water and some food were discovered in the landing gear compartment after the flight arrived at London Heathrow on June 30. The man's body was found in a garden in Clapham, south London, shortly before 3.40pm that day.

More Than 17 Tons of Cocaine Seized from Liberian-Flagged Container Ship

Homeland Security Investigations (HSI) Philadelphia and U.S. Customs and Border Protection (CBP) today hosted a joint press conference at the U.S. Custom House in Philadelphia to announce the multi-agency seizure of over 17 tons of cocaine with an estimated street value of about \$1.1 billion. Several days earlier, CBP, HSI, and U.S. Coast Guard authorities detected anomalies while examining seven shipping containers aboard the MSC Gayane, a 1,030-foot Liberian-flagged container ship.

U.S. Airstrike Kills al-Qaeda Fighters ‘Plotting External Attacks’ Against American Citizens

U.S. Forces conducted a strike against al-Qaida in Syria (AQ-S) leadership at a training facility near Aleppo Province, Syria, June 30, 2019. This operation targeted AQ-S operatives responsible for plotting external attacks threatening U.S. citizens, partners, and innocent civilians. Northwest Syria remains a safe haven where AQ-S leaders actively coordinate terrorist activities, to include planning attacks throughout the region and in the West. With allies and partners, U.S. Forces will continue to target Daesh and al-Qaida to prevent both groups from using Syria as a safe haven.

The Mysterious Death of Islamic State Wilayah Hind’s Militant in Kashmir

On June 26, a militant named Adil Ahmed Das, affiliated with Islamic State’s Hind Province (ISHP) was found dead, while another militant Arif Bhat was found in injured condition in an orchard area in Bijbehara town of South Kashmir’s district Anantnag. As soon as the news of the shootout was reported by local Kashmiri and mainstream Indian media, there were many speculations from all sides. Some pro-IS Telegram channels blamed Lashkar-e-Taiba (LeT) while others blamed Hizbul Mujahideen or Indian security forces.

Bag Identified as Containing Sarin Nerve Agent Sent to Facebook

A bag possibly containing sarin, a chemical nerve agent, was found during a routine [check of mail at Facebook’s headquarters](#) in Menlo Park, California. Although the bag tested positive for sarin, no one who works at the warehouse where the mail was tested is showing any signs of sarin poisoning. The package was examined after it was identified as suspicious. Three buildings were subsequently evacuated and the FBI and National Guard were called in to help with the investigation. Sarin exposure is deadly even in the most minuscule amounts if not treated early with antibiotics, fresh air and soap (on any affected skin).

New ISIS Cybersecurity Bulletin Shows Interest in Microsoft BlueKeep Bug

The latest cyber security bulletin from ISIS supporters to followers of the terror group highlights the vulnerability of some million devices to the “BlueKeep” Microsoft flaw dubbed “potentially wormable” by the National Security Agency. The Electronic Horizon Foundation launched in January 2016 as an IT help desk of sorts to walk ISIS supporters through how to encrypt their communications and otherwise avoid detection online while coordinating with and recruiting jihadists. “It is time to face the electronic surveillance, educate the mujahideen about the dangers of the Internet, and support them with the tools, directives and security explanations to protect their electronic security, so that they don’t commit security mistakes that can lead to their bombardment and killing,” the group said in its founding announcement. The EHF just issued bulletin No. 44 with six top stories: the BlueKeep bug, Huawei looking for an Android OS as it weathers bans, Telegram being hit with a DDoS attack from China during massive Hong Kong protests.
