Ultra-fast bomb detection technology could boost airport security

Researchers at the UK's University of Surrey have developed a reliable way to scan for and quickly identify the chemical fingerprints of a wide range of bomb-making materials. "The critical advantage of this system is the ability to uniquely identify the explosive being detected, making it much less likely to create false alarms," Surrey scientist Patrick Sears said.

TSA catches 22nd gun of the year at BWI

•A Pennsylvania man was arrested on state weapons charges after he was caught with a loaded gun at Baltimore-Washington International Marshall Airport on Wednesday. It was the 22nd gun confiscated at an airport checkpoint by Transportation Security Administration officers this year. That's equal to the number of guns caught in all of 2018. The gun was found in the man's carry-on bag; the weapon had eight bullets, including one in the chamber. The man told officers that he forgot that he was carrying it.

Killer Drone Boomerangs Back to Kill ISIS Fighter

•A plan to attack Allied forces in Iraq [backfired](#) when a commercial drone outfitted with explosives by an ISIS fighter boomeranged back to kill him, reported *The Sun*. Drones are programmed to fly back to their owners if they aren't sufficiently charged, which was apparently the case in this incident. Although the story was just released, a UK security source told *The Sun* that incident occurred after the battle for Mosul. "We learned this idiot had wired up his drone with explosives but was killed when its batteries ran low and it flew home. With a weak signal for some reason it detonated over his head," the source said.

Child suicide bombers, and the shelter rehabilitating them in Indonesia

They have been manipulated and radicalised to become fighters and human bombs. Will re-socialising and counselling these children at a secretive centre be enough? The programme *Insight* finds out. They have been manipulated and radicalised to become fighters and human bombs. Will re-socialising and counselling these children at a secretive centre be enough? The programme *Insight* finds out. Amirah (not her real name), along with other child survivors from these families, is now being treated at a Jakarta safe house. There, they're being cared for by psychologists like Ms Susti Saragih, who deals with the children of suicide bombers or minors directly involved in terror plots.
