Consultancy Services

Security Audits & Inspections

Security audits for Commercial Premises, Airports, Ports and Shipping Vessels.

Regulated Agent Regime for Airfreight Security

Study, Development and Implementation of RAR in accordance to ICAO Annex 17.

Hold Baggage Screening System

Study, Development and Recommendations for HBS systems in Airports and Ports.

Writing of security Programs

Corporate Security Training

Bomb Threat Management

Understanding & Managing Security Threats

Security Management

Security Awareness for Employees

First Line Crisis Mitigation

Crime Prevention Techniques

Campus, Hospital and Hotel Security

Risk & Vulnerability Assessment

Basic Investigations Course

Airport Company To Take Over Aviation Security Controls At BER From 2024

The airport company, FBB, has been given more responsibility for aviation security controls at BER Airport. The Federal Police today handed over responsibility of implementation, planning, management and financing of aviation security controls on passengers and their baggage to FBB in accordance with Section 5 of the German Aviation Security Act (LuftSiG), with effect from the beginning of 2024. The ceremony marking the handing over of responsibilities took place on 4 October 2023, which included the handover of a relevant certificate of responsibility. This signifies an important milestone in the reorganisation of aviation security controls at BER from 2024.

Leidos Launches Next Generation Enterprise Software Platform for Airport Security

Leidos has announced the launch of ProSight™, its newest enterprise software platform. ProSight, which provides airports and commercial organizations with high-risk points of entry a centralized, security management system, will be unveiled during inter airport Europe 2023, held Oct. 10-13 in Munich, Germany.. ProSight brings together systems and technologies that were traditionally disparate at security checkpoints, such as security screening equipment, threat detection algorithms and other third-party data. With a holistic view across the entire security screening operation, ProSight delivers actionable, real-time data through business intelligence dashboards, helping organizations improve operational efficiencies while enhancing threat detection.

Bomb Detection by Robots

The European Defense Agency (EDA) has successfully demonstrated how artificial intelligence and unmanned systems can work together to detect explosives and improvised explosive devices (IEDs) in different scenarios, which is a major breakthrough for defense research. According to Interesting Engineering, the demonstration involved one UAV and two UGVs, each equipped with different sensors, which coordinated autonomously to search for mock-ups of explosives and IEDs, including unexploded ordnance, in rural and urban areas. The demonstration showed that the system can perform complex tasks with minimal human intervention and was part of AIDED- "Artificial Intelligence for Detection of Explosive Devices". The system uses various sensors for detection, like the EMI (metal detector that can locate metallic objects underground or inside objects), the ground penetrating radar.

Ski Boot Warmer Sparked Queenstown Airport Bomb Scare

A ski boot warmer stored in luggage sparked a bomb scare at Queenstown Airport that prompted an evacuation and emergency response on Friday morning. Airport chief executive Glen Sowry said the electrical device was spotted during screening of checked luggage about 8.40am. It sat under other dense material inside a bag alongside a computer and had wires hanging from it. "Aviation Security staff had a close inspection and determined that it was a serious concern," he said.

Man Arrested In NAIA For Fake Philippine Passport

A man with a counterfeit Philippine passport was intercepted at the Ninoy Aquino International Airport on Wednesday, the Bureau of Immigration (BI) reported. The BI shared that Phimpa arrived on board an AirAsia flight from Bangkok, Thailand, and claimed to be deaf and mute when he presented a suspicious passport. The BI said an immigration officer found numerous inconsistencies with the passport and submitted it for tertiary inspection in the bureau's forensic documents laboratory.

Ukraine's IT Army Behind Attack On Russian Airline Systems, Minister Says

Ukraine's [IT Army](#) has hacked Russia's Leonardo airline booking system, causing major disruptions at the country's largest airports, Ukraine's Minister of Digital Transformations Mykhailo Fedorov [said](#) on 5 October. In a Telegram post, Fedorov said if Ukrainian airports cannot operate due to Russia's war, then Russian ones should not either. "The IT Army is actively working, almost everyday Russian sites go down, data leaks, and government agencies are paralyzed. One of the latest cases is the shutdown of Russia's largest airports," Fedorov wrote. On 28 September, Russian airlines [reported](#) issues checking in passengers at airports due to a glitch in the Leonardo booking system operated by Sirena-Travel, which is linked to the state defense conglomerate Rostec.

TSA Stopped Over 1,800 Firearms At Airport Checkpoints Nationwide

During the first three quarters of 2023, the Transportation Security Administration (TSA) intercepted 5,072 firearms at airport security checkpoints, and at the current rate, the agency will surpass last year's record 6,542 firearms prevented from getting onboard aircraft. In the third quarter, which ended Sept. 30, Transportation Security Officers (TSOs) stopped 1,820 firearms at checkpoints. The total represents an average 19.8 firearms per day at TSA checkpoints of which more than 94% were loaded. "Passengers may travel with a firearm, but it must be in their checked baggage," said TSA Administrator David Pekoske. "Firearms are only permitted in checked baggage, unloaded in a locked hard-sided case and must be declared to the airline when checking the bag at the ticket counter. Firearms are prohibited at security checkpoints, in the secure area of an airport or in the passenger cabin of an aircraft even if a passenger has a concealed carry permit or is in a constitutional carry jurisdiction."
